EXTRAORDINARY CURE OF A COUGH HER MAJESTY'S GUNBOAT "NETLEY,"
WICK, N.E. COAST OF SCOTLAND,
September 7th, 1868

DEAR Sir.,

Baring had a most distressing cough, which caused
me many sleepless mights and restless days. I was recommended by His Lordeblip the Earl of Caithness to try
your invaluable BAISAM OF ANISED, and I can assuyou with the first dose I found immediate relief, even
without having to suspend my various duties; and the
first small bottle completely cured me, therefore I have
the greatest conddence in recommending it to the million
Most respectfully yours. To MR POWELL. W. LINZELL, H.M.G.B. NEILEY

LPOWELL'S BALSAM OF ANISEED," For Coughs, Colds, Influenza, Shortness of Breath, Asthum Bronchitis, and for all affections of the Lungs, this old established remedy will be found invaluable.

old established remedy will be found invanable.

E the large sales and increased demand for this excellen
and elegant preparation, which has followed its intro
duction in a Australia, New Zealand and nearly all the
Britise Colonies, has induced the Peopristor to still further extend the benedicial esnits of its use, and the begr
to announce that he is walthoddening its sale into Vic
toria, B. G., and has appointed Messra Milard & Beedy
Wholesale Agents, through whom Chemists and Store
geopers can obtain a supply.

THE PRICE S WITHIN THE READH OF ALL CLASSES;

GEORGE'S MARKET

Sunday Morning, Nov 27, 1870. Cranberry Culture. Of the many natural productions of British Columbia, there are, perhaps, few less understood and appreciated than the cranberry. Less still is the value of the lands which produce that berry realized. The cranberry lands of this colony are chiefly confined to the delta of the Lower Fraser, where, in some seasons, as many as fifteen hundred barrels have been gathered by the Indians This season the cranberry crop in that region has been a failure, owing to the prevalence of fire. No attempt has yet been made in this country, so far as we are aware, to cultivate the cranberry, an industry of no inconsiderable magnitude and importance elsewhere. The savanna and the bottom lands of New Jersey, lying in Ocean, Burlington, Atlantic, Camden, and Cape May counties, are the best known for the culture of the cranberry. The lands used for its culture are soft, spongy lands. Those lands having a running stream of water are the most valuable, as it is of no little importance to be able to inundate the ground, during the late fall and winter—
in order to kill the grasses and vermin
and to protect the vines from the action
of the frost. In dry summers it is necessary in order to preserve the moisture without flooding the land, to fill the lateral diches with water. This will moisten the ground sufficiently, and the scalding of the plants, apt to result from summer flooding, is avoided. To pre-pare for the vines the brushwood is removed, the land turfed, and the roots grubbed out. Lateral ditches are dug from the main stream or ditch. dividing the ground into plats, each plat suffi-ciently taised at the centre to cause the water to flow off. In the ground thus the water to how our. In the ground thus prepared the vines are planted about fittee inches apart, and these will bear the second year. The product veness of these vines is something astonishing. In order to give the reader some idea of the great yield of these cranberry leads and the profitableness of the bus lands and the profitableness of the bus iness of cranberry farming in those countries above reterred to, we will make a few extracts from an article in the Trenton Gazette. 'A bog of a few acres, which had not received a particle of care since the vines were planted, yielded this year one hundred bushels to the acre. Another bug of six acres, belonging Mr William Allen, which yields this year its first full crop, whi h yields this year its first full Grop, produced about 200 bushels to the acre. These figures may seem astoni-hing, but one has only to see a bog and notice the perfect mass of fruit to have all doubt removed. The cranberry crop of a single township in Ocean county will reach this year 10,000 bushels, while that of the county is estimated at 25,000 bushels. The same authority goes on to say: The value of there laids, previously regarded as worthless, is something remarkable. The Messrs Gowdy have refused \$1,250 per acre, cash, for a bog the vine, of which are two and three years old. The reason of this is obvious. The lowest estimation of a full-bearing bog is 100 bushels per acre. The average is from 50 to 100 bushelsabove this. Take the minimum—100 above this. Take the minimum -100 bushels—as the average yield. The cost of picking is 50 cts per bushel. The cost of cultivation, after the second year, will not average \$5 per acre. The present wholesale price of cranberries is \$5 a bushel, or a net yield or \$450 per acre, at the lowest possible \$450 per acre, at the lowest possible estimate per year; or an interest of 45 per cent per year on an estimated value of \$1,000 per acre. But the average is above this. The yield, when the vines are three years old, and for a long series of years, will almost certainly reach an average of 150 bushels per acre. The cranberry is not like the strawberry, peach, and other perishable fruits, but can easily be kept for a strawberry, peach, and other perishable fruits, but can easily be kept for a year or more. In the spring the price often reaches \$10 per bushel. Take these figures and you have a return of say \$1,400 net per acre per year.' The same paper continues; 'It is not possible that the market can ever be glutted ith this fruit. The small area which can be employed in its culture, and the fact that the European market has been open to its sale, and that the berries are now used for dyeing purposes, forbids the thought that they poses, formes the thought that they can fail to command a good price continually. It may be observed that, if the wild cranberry of the Lower Fraser generally brings as bigh as \$6 a bushel in San Francisco, the cultivated berry would command a much higher price; for there is scarcely less dif-ference between the wild berry and the cultivated one than between the wild apple or plum and the best domestic varieties. These facts and figures will suffice to give the reader some idea of the profitableness of cranberry farm-ing, and of the great value of the lands adapted for that purpose. Nor can we think he day is very distant when the cranberry farms on the Lower Frathe cranberry farms on the Lower Fraser will become a source of greater
wealth than the gold mines of Cariboo.
While upon this subject we may subjoin a parsgraph which we clip from a
late Portland (Oregon) paper, as showing that the cranberry lands of the
North Pacific are even now attracting

the attention of those who understand their great value:—Quite an impetus

has been given to the sale of marsh lands in Washington Territory recently by

the advent of New Jersey cranberry the advent of Now Jersey cranberry growers in quest of these very valuable lands. In New Jersey good cranberry lands sell readily at one thousand dollars per acre, and there is no reason that they shruld not prove equally valuable here. It requires a peculiar location, and very favorable soil to produce this most healthy of all the small fruits. There is, we understand, one large marsh near Gray's Harbour that is already covered with cranberry bushes, growing wild and yielding considerable fruit, which is picked and sold by the Indians. And, recently, some gentlamen of dians. And, recently, some gentlamen of this city caused the marsh to be surveyed and have purchased the whole of it from the Government. They have got a big specula-

BUBNING THE DEAD,—Necessity seems to be bastening the return of the ancient custom of burning instead of burying the dead, and in France a burying the dead, and in medical commission has been appointed to examine into the propriety of thus disposing of the bodies of the victims of the war. The natural decomposition of bodies in graves poduces as is well known, gases which exert a highly dethrow, gases with each a larger teletrious effect up n persons inhaling them, and even quicklime added in the large, common tenenes to basten the destruction of books, does not prevent the disengagement of infection producing emanations which penetrate the earth covering the mass of purridity. It is not proposed to substitute cremation for inhumation in ordinary cases, but to ascertain how great is the danger to survivo.s afte a great battle, when the co. pses are buried in a narrow space, and to inquire whether burning them would not possess many advantges. In the mountime Professor Hofmann, of Berlin, has writen to the Editor of the Chemical News, asking all chemical manufacturers to help in procuring an early and large supply of disintectants, to prevent the hospitals which are rapidly being established throughout Germany, Alace and Lorraine, from becoming hotbeds of all sorts of contagious poisons. War poisons the physical as well as the moral atmosphere.

Over thirteen hundred babies have been received at the Foundling House, in Twelfth street, since its foundation, not quite a year since, says the New York Sun. Thirteen hundred babies thrown away in less than a year Truly New York is a highly moral

Important News from Omineca

From a number of miners who are just down from that section we [Mainland Guardian | learn that the new creek (Germansen) has realized the most sauguine expectations has realized the most assigning expediations formed of it. The diggings are shallow, generally about four feet deep and have paid whete they have been tried. From all appearances Omineca will attract a great number of miners next year from all sections, Food is high and many of the men have come down country in consequence. Vitalle c-eek is turning out better than expected. We is turning out better than exposed. We have been kindly permitted to make the following extract from a private letter, received from a miner with whom we are personally acquainted, and upon whom we can place the most perfect confidence. The letter was written to convey the most authentic account, and without any view to publication:

GERMANSEN CREEK, Ominoca, October 21st, 1870. October 21st, 1870.

My dear—, Tho cold weather set in yesterday, and was most severe. I have not yet decided where I shall go this water, but it is likely I shall go down to Victoria, or I may possibly winter at Tatlah Landing. If I winter at the latter place I will build a house. You asked my opinion of the country, and I believe the country is good for several years. All the claims that wore in good working order this autumn have done well. I will now give you an idea of the claims, and for this purpose will begin at the foot of the cre k: The first com any have laid over. The second consists of 15 Chinamen, but I don't know kow much they have made. The third company—Pat Kelly's—have made from \$10 to \$30 per day to the hand—their ground is from 2 t · 3 feet deep. Fourth company laid over. The fifth deep. Fourth company laid over. The fifth

Joe Claribue, 4 men—have made from 20
to 60 oueces per wee's, their ground being
from 2 to 6 feet deep. Sixth company—John Guigeum, 3 men-from 18 to 20 ounces per The celebrated 12-foot Davis com pany from 20 to 109 ounces per week. The B Holladay company have made an aver-age of \$20 per day to the hand. The Chapman company from 1 to 2 ounces per day
to the hand. The Discovery company have
made from 20 to 70 ounces per week. The
Black Pine co have made from \$10 to \$20 per
day to the hand, the Sylvester co 1 to 2 oz per day to the hard. The company above have made an ounce to \$20 per day to the hand, made an ounce to \$20 per day to the hand. I have now arrived at my claim, from which we have taken as high as 20 ounces per week. The next company above us have made expenses, Moore & co have made wages. The Black Rear co's saccers I have not learned. Lemeur co have made to five men 70 ounces last week, and the next company have made \$8 to \$10 and the next company have made \$8 to \$10 and the next company have made \$8 to \$10 per day to the hand with a rocker. Fenten & Bro have a very rich claim. Graton & co have \$10 \$14 per day to the hand, besides a naget that weighed 27 ounces, which I think all give from 18 to 20 ounces of pure gold.

In going higher up the creek there are several companies whose claims are laid over. Fred Black showed me a nugget which he took from his claim at the top of the creek, weighing \$50. The creek has been prospected for at

from his claim at the top of the creek, weighing \$59. The creek has been prospected for at least three miles and it prom see to be equally good throughout. Vitalle creek, I believe, has as yet been prospected very little. Messrs Rombro and Cuichon have a claim on the flat which pays them about 2 ounces per day to hand. The country around here has every indication of being a gold country, there being say amount of quartz. any amount of quartz. THE GREAT ATTRACTION .- The dramatic entertainment on Monday night, in aid of the 'Captain' Relief Fund, gives certain promise of more than common attractiveness and pleasure. To the well known talent com-

pleasure. To the well known talent com-prised in the Naval and local Amateur Dramatic Clubs has been added that of the Pixley Sisters and of Miss Eva West, the valuable services of there young ladies hav-ing been generously volunteered for the oc-casion. The programme for the perfor-mance has been issued, and it is one such as ought of itself to secure a full house. We have reason to know that every effort is hehave reason to know that every effort is be ing made to render the entertainment worth of the patronage of the public and worthy of the high and commendable object in view and we feel well assured that neither the talent of the performers, the exertions they are putting forth, nor the charitable object will fail to receive practical and substantial recognition at the hands of this people. I is not often that duty and pleasure are so happily blended, and we are sure that there is no need to urge the public to do their part towards making the entertainment a complete success in the fullest sense. Let application for reserve seats be made early.

THE NEW MAYOR REFUSES TO COUNTEN-ANCE ILLEGAL EXPENDITURE .- A few days ago a requisition was circulated by Mr G C Kenys. It called upon His Worship Mayor Robertson to convens a public meeting and take the sense of the ratepayers upon Councillor Carey's unconstitutional proposition to expend \$500 or \$600 in determining the practicability of bringing the Transconti-pental Railway across Jahnson's Straits. practicability of bringing the Transcontinental Railway across Johnson's Straits. The requisition contained 85 signatures and was handed to the Mayor on Friday evoning. Yesterday His Worship addressed his reply to Messrs Roscoe, Duck. Keays and 83 other requisitionists. His Worship says that, having examined the Act of Incorporation, he is of opinion that the Municipal Council has no power to devote any portion at the city revenue in the way proposed, and that he does not think any public meeting can confer such power on the Council. For those reasons he leels obliged to decline to comply with the wishes of the Requisitionists. This—almost the first—official act of Mayor Robertson evinces a decision of char-Mayor Robertson syinces a decision of character and honesty of purpose worthy of all

FROM THE MAINLAND .- The steamer Enterprise arrived from New Westminster last evening at 4:30, bringing about twenty passengers, a Cariboo Mail and Express, also \$47.000 in treasure for the Banks. Among the passen-ger were Messrs Michael, Grier, Roper, Uriah Nelson, Johnston, Cook, Lieut Lambert and Capt Moss.

NEW WESTMINSTER CEMETERY BOARD .-The Governor has appointed the Hon A T Bushby, W J Armstrong, Esq., and H V Edmonds, Esq., to be Trustees of the New Westminster Cemetery, to Sarry out the provisions of the 'Cemetery Ordinance, 1870.'

Lower Fraser ITEMs .- On Thursday New Westminster was visited by a severe gale, which did some damage to fences and other property. Mr E Brown's new barn, on the opposits side of the river, was blown down....A coal seam of good promise is being opened at Sumsas. It is in contemplation to construct a transway and work the seam.....The steamer Levisthan was at Mud Bay with a party of Victoria sportsmen....The water in the Fraser at Yale had risen two feet in consequence of recent rains......The steamer Lowert on the Praser at Yale had risen two feet in consequence of recent rains.......The steamer Onward on her last trip to Yale took up a large quantity of Sumass butter for the

CARIBOO NEWS. - The mining news is to the 12th inst, but it possesses no very special interest. The cold weather had to a great extent put a stop to mining operations, and preparations were being made for winter workings. In a few days, it was thought, active work would be resumed. On Light-ning creek the company of that ilk had washand goresk needs company of that his bad washed up 2730zs, as the result of half a week's work, and, again, on Wednesday washed up 1040zs, the result of one day's work. The Spruce ce, on the same crock, took 220zs out of four sets of timbers. The steamer Enterprise had gone into winter quarters and navigation was closed for the season.

CARIBOO ELECTION. - The news brought lown by the steamer yesterday settles the Cariboo election. Dr Carrall had the following majorities: Barkerville 30; Keithly Creek 3; Lightning Creek 4—total, 37. At Quesnelmouth Mr Booth had a sufficient majority to reduce that of his opponent to 16.—The contest was, according to our information, a close and exciting one. We must be permitted to congratulate Dr Carrall upon his re-election, not because we do not consider Mr Booth a fitting representative, but because we think it well that the doctor should have an opportunity of completing the great work in maturing which he has acted so prominent and important a part.

IMPORTS. - The Customs returns of imports for the quarter ending 25th September, 1870, are published in the Government Gazette. The total value of imports for that period is \$425.785 90, against \$428.826 76. Phese returns are chiefly remarkable for the large items of articles which ought to be rated in the colony, such, for instance, as the following: Bacon and hams \$1138, bar-ley \$1304 bran and shorts \$3773 90, cheese \$3846 37. flour \$22,105 49, lard \$1325 50, live stock \$12,263, wheat \$1229 49. As a set off to these figures, however, we find butter reduced to \$720, eggs to \$13 50, bay to \$330 and hops to \$156 80.

FRANK RICHARDS' BENEFIT .- It will be seen by reference to the published correspondence in another column, that a complimentary benefit has been tendered to and accepted by Mr Frank G Richards, of the Albambra. The Mr Frank & Richards, of the Alhambra. The performance is to come off on Tuesday evening, and will be under the patronage of the Victoria Fire Department. The indefatigable efforts of Mr Richards to supply this community with amusement at no little pecuniary sacrifice, taken in connection with his personal papularity cought to insure a good house on al popularity, ought to insure a good house on Tuesday night.

THE PRICE OF COAL. - In an item under this head we mentioned yesterday that the 'coal from the Douglas mine is, or is about to be, sold at \$5 50 per ton.' We find that if such reduction has really been made the local desiers have not yet received the benefit of it, inasmuch as their last ship ments are invoiced at \$6.50 per ton. We state this in justice to the local dealers, who might otherwise be suspected of having with-held from beir customers, the advantages of a reduction which appears to be still in the future.

BRITISH CAPITAL .- In a recent number of the Money Market Review it is estimated that £50,000,000 of British capital are invested in foreign railways; £110,000.000 in colonial railways; £200 000.000 in lodiau colonial debts; £400 000.000 in foreign stocks, besides an unknown smount in foreign banks, insurance, steam navigation, dock, plantation, land and mining compa-

'SHOO FLY!'-Our morning cotemporary is trying to extort a notice from us. We are too busily engaged to pay attention to the fellow just now; but we promise him a fair share of attention in the course of a few days—provided his feeble flicker be not snuffed out in the meantime.

there was the usual round of amusement. The audience was large and appreciative. On Wednesday evening Mr Richards will close the house to allow his orchestra to play at the St Andraw's Dinner; and on Thursday evening he will also close to enable the orchestra to perform at the ball on board H M S Scylla.

REMEMBER. - Yes! remember Monday night. Combine duty and pleasure. Contribute your mite towards a national charity and enjoy a rich and rare treat.

It is rumored that Capt Wm Moore, formerly of the steamer Alexandra, has arrived at Quesnelmouth with \$8000 in Germanson creek dust.

and orphans of the noble fellows who went down with the illfated ' Captain.' HUMPHREYS has been declared returned

REMEMBER Monday night and the widow

ember for Lillooet-Clinton District.

INVITATIONS are out for a ball on board H M S Scylla on Thursday next.

Read the correspondence anent the benefit of Frank Richards,

The bark Shooting Star sailed for Nana mo from San Francisco on the 25th inst.

THE bark Alaska, Capt Higgins, got underway yesterday for Callao.

GILMORE, MERCHANT TAILOR, and General Outlitter, has removed his place of business to the store adjoining the Colonial Hote and opposite the Colonist Office, on Government street fourth door from Yates, where he proposes to give his old friends and new customers a chance on the principle of quick sales and small profits.

REMEMBER THE FATE OF ABSALOM .- Fred Payne, Tonsorial Artist. Shaving 121 cents Hair Cutting 25 cents, Shamponing 25 cents That Original Cheap Shaving Shop stand ou the sunny side of Johnson street.

The Railway Petition.

from your columns that the petition on the question of the railway terminus is about to be presented to the Gevernor. With several others I had hoped that this silly movement (now that the election is over) would have been allowed to drop.

Surely no intelligent signer of that petition expects the Governor to take any action of the conflict was light.

London, Nov 24—Empress and Prince Imperial leave on Saturday for Whilhelms-hope.

Surely no intelligent eigner of that petition expects the Governor to take any action on the prayer therein contained. Are the people of Victoria really serious in calling on the Governor to do an unconstitutional act? Are they aware that this petition asks the Governor to take measures to set aside a deliberate act passed during the last session of our Legislature and since so ably negotiated by our delegates and so generously accepted and endorsed by the Privy Council of the Dominion? Has the intelligence of this community no higher opinion ligence of this community no higher opinion of the shrewdness, ability and statesman ship of Governor Musgrave than to suppose that he will be disloyal to the high trust re-posed in him by the Urown? Is he to cease to be Governor of British Columbia and be-

come a petty partizan—mixing in our sectional and local squabbles?

Is it the correct thing to pray the Governor to do what other sections of the colony consider a wrong, and what, as an impartial administrator of the colony's affairs, be dare oot do? If petitions are to have any effect on this question—which I deny—tuen let us perition in the right quarter, viz, the Legislative Council.

If the people of Victoria, instead of exponding their efforts in prayers and such like which will have no effect whatever in locat-ing the termicus, would go in carness to work and collect all the data available as to the practicability of the route and the advan tages of Esquimalt as the terminus, and bring at the proper time the whole influence of this section of the colony to bear on those who will have the determining of the queswisely.

You are aware, Mr Editor, that from the very inception of this question I have held to the idea al Fequimali being the terminus of our trans-continental railway, and as my whole interests are here I would be willing to use every every tair and legitimate means in order to secure the attainment of so desirable an end. Let us only be able to show to the capitalists who will take hold of this great undertaking that it is practicable to bring it on to Yancouver Island, and that notwithstanding that British Columbia is north of the United States, by us having the terminus at Equimant it will thereby be to the south of any terminus the Americans can possibly locate on their side of the water and consequently we will be nearer to the ocean, and that Esquimalt, in the future as in the past, must command the trade of these waters. That we should throw aside snively ing prayers and petitions and set to work is Yours respectally the opinion of

gy Glectric Celegnaph.

SPECIAL TO THE DAILY BRITISH COLUNIST.

LAST NIGHT'S DISPATCHES.

LONDON, Nov 24—A Republican insurrection is momentarilly expected at Madrid. The Captain-General of Arragon telegraphed to Primithat a revolution will succeed if the reinforcements are not sent.

Earl Russel, writing to the Times, [3398:—If

he Czar proposes to set aside the Treaty of Paris by force, let us meet him by force, and

the Czar proposate Paris by force, let us meet him by force, and the sooner the better.

The Morning Post, refering to Gortzchakoff's answer to Granville's note expected here, says that diplomacy is wholly at fault in conjecturing its nature.

St Peterseburg, Nov 23 — Prince Gortzchakoff's reply to the British and Austrian Governments is very conciliatory. It explains the pacific meaning of a previous declaration and affirms that Russia craves for peace generally, and in the East especially. It would be and aimms that Russia craves for peace generally, and in the East especially. It would be impossible to maintain it without a common understanding, and Russiasbrinks from acting separately from the other Powers.

Berlis, Nov 24—The North German Parlia-

Berlin, Nov 24—The North German Parliament opened to-day. A speech was delivered on behalf of the King giving thanks to the nation for its courageous attitude, and unasimity of its support in the task of repelling the French aggression. France, it says, has been taught her inability to cope with united Germany. Peace would therefore be certain if France had Teaders who would sacrifice their personal interests in the future for the walfare personal interests in the future for the welfare of their country, but they would rather ruin a nation than relinquish power. This conflict of their country, but they would rather rain a nation than relinquish power. This conflict is regretted, but it perpetuates hostifities between the two nations, for France will only be peaceful until the opportunity for conflict arises again. The conditions on which Germany will make peace are well known. They are commensurate, with her sacrifices. A delensive frontier is essential to prevent agreement the German States, in the Western censive frontier is essential to prevent agrees, sion in the German States, in the North as well as the South. The Federal Government asks Parliament to grant the needful means for peace so eagerly desired. Its work has not been stopped by the war, which has begotten closer unity, especially between the Northern and Southern States. It is essential that negotiations with the latter be considered immediately by the Parliament. The search immediately by the Parliament. The speech immediately by the Parliament. The speech closes with appropriate congratulations and an appeal to God's favor.

Veneralizes, Nov 24—The Treaty uniting Bavaria with the Northern Confederation was signed last night.

New York, Nov 24—A dispatch from London says that it is now stated that Gortzchakoff was premature in the publication of his letter, as it annears that Thiers, when on his wister.

was premature in the publication of his letter, as it appears that Thiers, when on his visit to St Petersburg, stated that France long regarded the Treaty of 1856 as unjust to Russia as the Treaty of 1816 was unjust to France, and he expressed surprise that Russia had not sooner set it aside. He assured them that everyone in France had always been prepared to see and consent to its abrogation. This has a strict the new that the contest of the state of the to see and consent to its abrogation. This has so excited the popular mind that it is certain so excited the popular mind that it is certain that if Gorizchakoff had not published his circular it would have been expressed by Count Ignatiff, the present Minister at Constantinople, and the pet of the Muscovite party. Gortzchakoff showed his hand to save his place, but the popularity of his movements precludes the idea of backing out.

A London dispatch to the World says the

A London dispatch to the World says the British Government have issued orders for all men belonging to the Naval Steam Reserve to immediately join their vessels. The greatest activity prevails in the War Department. Admirally orders are constantly being given out, and the resignation of the present and the for-

mation of a war Ministry is certain.
Florence, Nov 24—Gen Menatzren will soon leave for his post as Ambassador to

Vienna.

No answer has yet been received by the Italian Government to Russia's circular.

London, Nov 24—The Germans deny that there is any truth in the statement, falsely ascribed to the Bishop of Geneva, that the French prisoners are refused the consolation of their religion. Wherever they are quartered

in sufficient numbers they are attended by a

ST PETER BURG, Nov 25-Papers are off

ST PETER-BURG, NOV 20—rapers are om-cially warned against supporting France and criticising the Germans interest of Russia being identified with the latter. The Times intimates Russia will be firm without closing her door to negotiate, an at-

without closing her door to negotiate, an attitude that England will imitate.

London, Nov 25—5 p.m.—The feeling in financial circles at this bour may fairly be called panic. There is no doubt the Prüssian Government is very firm in its demand relative to the Paris treaty.

VIENNA, Nov 25—The journals of this city and official organs are unanimous in expressions of low over the neareful tener of

expressions of joy over the peaceful tenor of the Red Book which has just appeared.

London, Nov 25—It is rumored that John Bright has resigned his position as President of the Board of Trade.

VERVALLES, Nov 26—In the Hungarian

means to rid herself of her burden.

PETH, Nov 25—In the Austrian delegation Count Von Beust neserted that nothing had been omitted required by the dignity of the monarchy, on the Black Sea question. He suid that no Prussian reply had been yet received and cautioned the members about speaking too much of war or peace as equality inonfortune in the present quisis.

ly hoofportune in the present crisis.

ST PETERSPURG, Nov 25—The Gazette of the 22d says, Russia is not ready for wat end cannot be before Spring. No step has been taken to place a fleet in the Black Sea or to

lortify its coasts. It will need an months to arm completely and to raise the money needed for war as well as to put the Nicolasoff tronolad ship yards again in working

Quite a fleet of vessels coming in.

SAN FRANCISCO, Nov 25—Arrived—Bark Zepbyr, Portland, ship Grace Darling, Liverpool, ship Newman, Newcastle, coal to Dickson, DeWolf & Co, bark Coronel, Honolalu, ship Royal Arthur, Leith, Scotland, coallulu, ship Royal Arthur, Leith, Scotland, coal blue, ship Royal Arthur, Leith, Scotland, coal and iron, bark River Eden, Hamburg. There is another ship 10 miles outside, name not made out. The Darling made the passage from Liverpool in 122 days, which is the best passage in two years.

best passage in two years.
Sailed — Bark Almatia, Portland; bark Shooting Star, Nanaimo:

A Remarkable Discovery.

The theory that the greater part of the Western waste was once covered by an inland sea seems not to be without foundation. It is stated that in the Yuma Desert, at intervals, pools of water have stood for a while in the midst of the surrounding waste of sand, disappearing only to rise again in the same or some other localities. A late issue of the Los Angelos News says: — A short time since one of these saline lakes disappeared, and a party of Indians reported the discovery of a 'big ship.' left by the receding waves. A party of Americans at once proceeded to the spot, and found imbedded in the sands the wreck of a large vessel. Nearly one-third of the forward part of the ship or bark is plainly visible. The stump of the bowsprit remains, and portions of the timber of teak are perfect. The wreck is located forty miles north of the San Bernardino and Fort Yuma road, and thirty miles west of Los Palmos,' a well known watering place on the desert. The road ac oss the desert has been travelled for more than one hundred years. The history of the ill-fated vessel can, of course, never be known, but the discovery of its decaying timbers in the midst of what has long been a desert will furnish savans with food for discussion, and may perhaps furcish important aid in the clucidation of questions of science.' VERSALLES, Nov 26—In the Hungariau Diet Von Beust said it is inexpedient to make disclosures on the Russian question.

VIENNA, Nov 24—Two letters from Count Beust to Count Chatlock were laid before the delegation yesterday. In the second letter Von Beust says: I have made no secret of my convictions that the later treaty placed Russia in an unworthy position. I was all the more pain d that she should take such means to rid herself of her burden.

PETH, Nov 25—In the Austrian delaga.

Fears are lately entertained relaive to an expected outbreak among the Indian Sepoys. These fears, says a well informed correspondent of the London Times, writing from Allahabad have no foundation. The Sepoys are comfortable and contented. Great care if taken by commanding officers that they are treated kindly by the English troops, and to the best of my belief, they appreciate the treatment which they receive.

The authorities at Washington are making arrangements to fund the National debt, under an Act passed at the last session of Congress. This will make the debt something like permanency, and place it in a position similar to that of Great Britain.

Salt Rheum and scabious Eruptions

Are, to a perfect certainty, relieved and removed By the use of Bristol's Sarsaparilla and Pills. The cleausing, searching, detergent properties of the Sarsaparilla neutralizes and seperates the poisoned humors from the healthy blood, and the Pills purge out and carry off the dangerous virus. 670

Flowers Fade and Die,

Helmbold's Fluid Extract Buchu

IMPROVED ROSE WASH

Will radically exterminate from the "system disease with rancing externative from the system diseases arising from habits of dissipation, at little expense, little or no change in diet, no inconvenience or expesure, com-pletely superseding those unpleasant and daugerous rem-edles. Copaiva and Mercury, in all these diseases.

Helmbold's Fluid Extract Buchu

In all diseases of these organs, whether existing in male or temale from whatever cause originating, and no mator tename, from wancever cause originating, and no mat-ter of low long standing. It is pleasant in taste and odor, "in-mediate" in action, and more strengthening than any of the preparations of Bark or Iron.

Those suffering from broken down or delicate constitutions, procure the remedy at once.

The reader must be aware that, however slight may be the at ack of the above diseases, it is certain to affect the

bodily health and mental powers.

All the above diseases require the aid of a Diuretic.

HELMBOLD'S EXTRACT BUCHU is the great Diuretic. Sold by Drugglats everywhere. Price \$1,25 per bottle, or 6 Bottles for \$6.50. Delivered to any address. Describe Symptoms in all com-

munications.

CHILORIODYNE IS THE ORIGINAL AND ONLY GENUINE.

Dr J Collis Browne's Chlorodyne,

Office Cought, Assuma, Cramp Ricematism, Nearalgia, Cough, Hysteria, &c.

EXTRAJES FROM MIDGAL OFFINIONS

The Right Hom karl Ressell communicated the Coltogee of Physicians and JT Davenport that he had received internation to the effect that the only remody of any service in Cholora was Chlorodyne.—See Lancet, Dec 31, 1844

servicein Cholore was Chlorodyne.—See Lancet, Dec 31, 1864
From A. Montgemery, Esq., atte Inspector of Hoeg Finals, Bombay: "Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to heaith after eighteen months' score suffering, and when other medichies had failed."
Dr Lowe, Medical Missionary in India, reports [Dec. 1852] that in nearly every case of Cholera in which Dr Joulis Brownos Chlorodyne was administered, the Extract from Medical Times, Jan 10, 1806—Chlorodyne is prescribed by scores of orthodox medical practitioners. Of course it would be also the second of the control of the cont

dical testimony accompanies each bottle.
